(4.9a) and (4.9b)] are immediately written down as

$$\hat{B} = \int_0^\infty \mathrm{d}\tau\, \mathcal{C}(\tau)\hat{X}(-\tau), \tag{5.19a}$$

$$\hat{C} = \int_0^\infty \mathrm{d}\tau\, \mathcal{C}(-\tau)\hat{X}(-\tau), \tag{5.19b}$$

where

$$\hat{X}(\tau) = \mathrm{e}^{\mathrm{i}\hat{H}_{\mathcal{S}}\tau}\hat{X}\mathrm{e}^{-\mathrm{i}\hat{H}_{\mathcal{S}}\tau} \tag{5.20}$$
